

# Samples

Mysti Berry wrote the following documents (including child topics) from scratch:

## Product Documentation

- [mParticle Data Subject Request Integration for Braze](#)  
I created the template for this document, making all the subsequent DSR integration docs easy to write—less than an hour in most cases.
- [mParticle Data Plans](#)  
Although not conceptually complex, this feature requires the user to move between a few different interfaces. It also has a lot of variability—different results depending on the input.

## How-to or Conceptual Articles

- [MuleSoft API Tutorial](#)  
We had about 30% completion to the last step when we first introduced it.
- [mParticle's Segment Migration Guide](#)
- [MuleSoft Composer for Salesforce](#)  
The release notes have been updated since I wrote this content set.
