# Samples

Mysti Berry wrote the following documents (including child topics) from scratch:

**Product Documentation**

- [mParticle Data Subject Request Integration for Braze](#)
  I created the template for this document, making all the subsequent DSR integration docs easy to write—less than an hour in most cases.

- [mParticle Data Plans](#)
  Although not conceptually complex, this feature requires the user to move between a few different interfaces. It also has a lot of variability—different results depending on the input.

**How-to or Conceptual Articles**

- [MuleSoft API Tutorial](#)

  I wrote the tutorial nearly 4 years ago, it appears to be untouched since then. We had about 30% completion to the last step when we first introduced it.

- [mParticle's Segment Migration Guide](#)

  A developer provided examples and some of this content was copied from existing content.

- [MuleSoft Composer for Salesforce](#)
  The release notes have been updated since I wrote this content set.
